

INDUSTRIAL STRENGTH LOW VISCOSITY, LOW ODOR, LOW BLOOMING CYANOACRYLATE ADHESIVE

**Excellent for use on applications
where appearance matters**
Leaves little to no white residue when dry

Eliminate frosting and odors typically associated with super glues by using this Low Odor and Low Bloom Super Glue by SureHold.

201 works on numerous surfaces and is great for use in areas with poor ventilation.

201 can be used for bonding a variety of plastics, metals and rubbers especially where a good cosmetic outcome is desired.

- Use on electrical components and automotive applications.

201 is a one-component, solvent-free system and does not require the use of a catalyst, heat or clamps.

- When a thin layer of SureHold 201 applied between two surfaces comes into contact with atmospheric moisture, a rapid polymerization occurs producing the ultimate bond.

201 is excellent for use in 3D printing processes – set and seal images in the final stages

Color: Transparent, colorless to straw color

Slower setting super glue allows you to adjust parts

Part No.	Product	Size	Case Qty
SH-201	Low Odor, Low Blooming Cyanoacrylate	20gr bottle	25
SH-2015	Low Odor, Low Blooming Cyanoacrylate	500gr bottle	1
