

RED THREADLOCKER PERMANENT STRENGTH

HIGH STRENGTH . . . FOR ASSEMBLIES THAT DO NOT REQUIRE FREQUENT DISASSEMBLY

- Stud & Bearing formula is a high strength, thread-locking anaerobic material that cures and locks between threaded connections to lock seal and retain. Resists leakage, shock and vibration. Ideal for fasteners 3/8" to 1" prior to assembly.
- Locks, seals and secures parts that must withstand heavy shock and vibration.
 - Prevents rust and corrosion
 - Keeps nuts and bolts from loosening
- Conforms to MIL-S-46163A, ASTM D-5363, NSF.
- Patented Dispenser
 - Drip-Proof, Clog-Proof Applicator, product won't clog or dry up with repeated use
 - Push the button on tube cap to puncture seal, twist off cap and apply
 - Precise and controlled distribution of the threadlocker
 - Minimum clean up, tube pulls the threadlocker back into the tube when you release pressure
 - A Minimum of 12 months shelf life once product has been opened and used
- Use on engine bolts and fittings, inner tie rods, transmission bolts, power steering, frame bolts, idler bearing, press fit filter tubes, shock absorber bolts, ring gear bolts, cylinder block studs, crank shaft bolts and more.
 - Automobiles, RV's and Recreational Equipment
 - Farm Machinery
 - Heavy Duty Power Tools
 - Air Conditioning Units
- Color: Red

Not recommended for use on nlastic threads. nuts or bolts
