

INDUSTRIAL STRENGTH

RUBBER

TOUGHENED

CYANOACRYLATE ADHESIVE

Designed for use in higher temperature and higher humidity environments.

B684 is a rubber toughened, high viscosity cyanoacrylate that can be used where flexibility and vibration resistance is required.

B684 is suitable to bond difficult materials such as thermal plastic and possess faster fixturing than epoxy resin, making it ideal for construction work.

• When a thin layer of **SUREHOLD® B684** applied between two surfaces and comes into contact with atmospheric moisture, a rapid polymerization occurs producing the ultimate bond.

B684 is ideal for bonds subject to daily use and harsh conditions

B684 bonds strongly and works best on:

- Metal
- Rubber
- Wood
- Plastic
- Other materials

Part No.	Product	Size	Case Qty
SH-B684	Rubber Toughened Cyanoacrylate	20gr bottle	25
SH-B6845	Rubber Toughened Cyanoacrylate	500gr bottle	1
